Tax Map No: 13.-1-39, 2022-0054

A recent visual inspection of 108 Old Liberty Rd reveals an unsafe and dangerous building(s). This building(s), in its present deteriorated condition, appears to be in violation of Town of Thompson Code, Chapter 113, Article I, Unsafe Buildings. In my opinion the following describes the current condition of the building(s):

- is or may become dangerous or unsafe to the general public,
- is open at the doorways and windows making it accessible to minors under eighteen years of age as well as to vagrants and other trespassers,
- is or may become a place of rodent infestation,
- presents any other danger to the health, safety, morals and general welfare of the public or
- is unfit for the purposes for which it may lawfully be used.

Description:

The building and accessory structures have not been maintained and have deteriorated to the point they are unsafe. The doors and windows are open and the building is accessible creating an unsafe condition. It is recommended the building be demolished.

This local law was enacted because of the continuing existence of abandoned and unsafe buildings. You are the owner or person interested in such building, and are hereby given notice to correct all such conditions or violations. If it is your intention to make repairs, a building permit must be obtained prior to the start of any work.

Please reply to this department within ten (10) days of receipt of this notice, thereby assuring this office of your intent to comply. Upon your failure to respond to this notice, a formal proceeding will be undertaken.

Very truly yours,

Town Board of the Town of Thompson
4052 Route 42
Monticello NY 12701

RE: Request for consideration of a Sewer District Extension
Town of Thompson Tax Map No. 13.-3-36.1
Saddle Ln. / Rock Ridge Dr.

Dear Supervisor Rieber and Town Board Members;

I represent the owner of the property mentioned above in the matter of working with the Town on annexing the property into the Consolidated Kiamesha Sewer District, so that the property can be served by municipal sewer.

The parcel is currently a vacant parcel with some wetlands on it. The owner is proposing to construct a 65-unit Row Housing Development with amenities.

The property has road frontage to Saddle Ln. and to Rock Ridge Dr. It also has frontage on State Route 42, which most likely will only be allowed for emergency access to the property.

The projected flow for this project would be 35,750 gallons per day (65 homes x 5 bedrooms x 110 gpd per bedroom).

Attached is a preliminary sketch for a 65-unit Row Housing Development.

Also attached is a tax map showing the parcel to be annexed into the Kiamesha Sewer District.

With this letter I would like to ask the Board to consider this request and take any action as appropriate to authorize the completion of a Map, Plan and Report by the Town Engineer.

If you have any questions, please do not hesitate to contact me at 845-796-9110 or by email at joel@jkexpediting.com

Truly yours,

Joel Kohn

Michael,

I'm now realizing that these are LED conversions with existing fixtures and arm assemblies currently in place. As such, new arm assemblies should not be required. Please see the updated cost estimate with material costs removed.

Michael,

My apologies for those typos- please see attached for updated cost estimates for the decorative fixture installs at Shirely Dr and Dartmouth Ct.

We will also revise the cost estimate for the 11 cobra head installs to reflect that the town has a stock of control nodes and luminaires that we can use. Please confirm whether or not arm assemblies will need to be purchased for these installations and I will get that updated estimate back to you ASAP.

Hello,

The scope titled Dartmouth Dr and Dartmouth Ct has Shirley Drive listed as the scope of work and the same 380' of wire.

For the 11 Cobra Heads, it lists Vac Truck under materials. I assume that is just a hold over from a template. We have stock of LED lights and nodes from the LED change over so materials may not need to be purchased.

Good Morning Mike,

Please see attached for the following Non-Routine Estimates:

- N Emerald Drive UG Fault Finding: **Estimate revised** with cost of vac truck for water pumping purposes. Most of the UG fault finding efforts will require the use of a vac truck- we have added the 2 day vac truck rental cost to this one WO, rather than estimate how long the vac truck would be needed at each location with UG issues.
- 11 Cobrahead installs (specific addresses and pole numbers found on attached estimate)
- Decorative fixture installation: Shirely Dr and Sheldon Dr
- Decorative fixture installation: Dartmouth Dr and Dartmouth Ct

As Pat mentioned, our next trip out is planned for 3/20 and 3/21. We plan to spend both Wednesday and Thursday on site utilizing the vac truck in the above cost estimate to perform trenching for fault finding and wire replacements. Please let Pat or myself know if there are any issues with this plan.

I have also attached a summary sheet listing all Non-Routine estimates that have previously been submitted to the town with current status of each WO. Please let me know if there are any questions/concerns about this list, thank you.
